Cell Biology Labfax

Synopsis

Each title in the LABFAX series is a reference tool for the practicing scientist. Tracking down data is time-consuming and can often be a frustrating experience. Until now, vital data have only been available by consulting a wide variety of journals, manuals and catalogs, databases, and scraps of paper buried around the work station. Now, each volume in the LABFAX series brings together key data for a major subject in one single reference source, saving time and effort. Presentation is highly visual, making generous use of tables, diagrams and half-tones. Each volume in the series is spiral bound in a hard case for ease of use and durability in the laboratory environment.
